Network Logical Map

Attached is the logical map of the network as of December 30, 1972.
The ovals indicate the host computers that we think are connected to
each IMP, with the double oval implying an interface. If there are
any errors in the map or if your status vis-a-vis connected hosts, is
going to change within the next few months, please contact:

        Nancy J. Neigus

        Bolt Beranek and Newman Inc.
        50 Moulton Street

        Cambridge, Ma. 02138

        617-491-1850   X511

or leave a message for NJN at the NIC. In the future we would
appreciate being notified any time there is such a change.

        NJN/jm

        Attach.

Attached is a figure of the ARPA NETWORK, LOGICAL MAP, JANUARY 1973

        [This RFC was put into machine readable form for entry]
      [into the online RFC archives by Helene Morin, Via Genie 12/99]
